

assistTek's Electronic **Outcomes** module offers a touch-screen tablet solution for questionnaires and assessments for both patients and study coordinators. The **Outcomes** module can be fused with any other module, or may be designed as a stand-alone system. This gives the flexibility of adding **ePRO** questions to a Patient eDiary, for example, or maybe a system of its own in a study site.

Features:

- ✓ Supports multiple languages
- ✓ Easy to use touch-screen
- ✓ Supports exit/save/resume for long questionnaires
- ✓ Supports branching logic
- ✓ Lightweight & portable, easy to use in an office or home
- ✓ Supports 3G/4G cellular communication or Wi-Fi
- ✓ Eliminates Transcription Cost
- ✓ Reduce Monitoring Costs
- ✓ Eliminate Source Data Verification
- ✓ Significantly Reduce Queries

About assistTek

For over 18 years, assistTek has been successfully fusing new developments in technology with creative software solutions to revolutionize the collection of data from patients and clinicians in clinical trials.
