

assistek's **Patient eDiary** module is designed to collect critical study data from patients at home when it matters most. All eDiaries are intuitive, easy-to-use, and highly customized to meet specific protocol objectives and requirements. Study teams will manage the study, and patients, more effectively with real-time access to patient events, potential compliance concerns, and safety issues.

### System Overview:

The Event Screen is unique and effective for ensuring the highest quality data is reported.

Always connected

assistek's Diary can record any custom event daily, or at unique intervals.

Engagement Media keeps patients on-track and involved in the study.

### Specifications of eDiary shown above:

7" Android Tablet

- **Portable:** Only 4.74 x 7.48 x 0.47 inches. Easily fits in purses or small bags.
- **Lightweight:** 13.58 ounces allows you to take it with you anywhere!
- **Communications:** Uses 3G/4G Cellular Communication to send data instantly.

# Patient eDiary

**Features & Benefits:**
